

C.I.Agent Solutions® Provides Pollution and Product Liability Insurance of Up To \$7 Million

C.I.Agent Solutions® is so confident in the quality and performance of its products that they back them with a \$7 Million Pollution and Product Liability Insurance Policy.

Totally unheard of in this industry, Dan Parker, CEO of C.I.Agent Solutions, believes his company's products perform better and are less expensive to use than the competition therefore he backs them with this insurance policy. "Our products are based on new technology and companies are reluctant to try them even though we can provide case studies, test documents, and testimonials. Plus, our products are manufactured under quality controlled conditions. This policy is an extra bonus for our customers' peace of mind."

Highlights of the coverage:

- Claims for on-site bodily injury or property damage resulting from pollution conditions, caused by our products, on or under an insured property.
- Claims for bodily injury or property damage resulting from pollution conditions, caused by our products, beyond the boundaries of an insured property, that migrated from the insured property.
- Payment of sums if the insured becomes legally obligated to pay as loss because of bodily injury, property damage or environmental damage resulting from pollution conditions caused by our products.
- Payment of sums if the insured becomes legally obligated to pay as loss because of bodily injury, property damage or environmental damage resulting from pollution conditions caused by our work.

The fine print:

As with any legal document there are certain stipulations that have to be met. Here is a brief, non inclusive, overview:

- The C.I.Agent Solutions® product must be installed properly; must be in good working condition before being installed or used; must be used in the manner for which it was designed and instructions for use followed; cannot be altered or mutilated in any way.
